COTTON MARKETS.

New York, October 24.—There was a continuation of heavy selling for both long and short account in the cotton market to-day and prices made new low records for the movement with the close easy at a net loss of 25°41 points. The market opened easy at a decline of 70°22 points, and inside of the first haif hour soil off to a net loss of 25°31 points under liquidation and boar pressure, inspired by weak cables and reports that frosts in Eastern and Central sections of the beit over Sunday haid not been heavy enough to kill the plant over any important area. Covering caused a raily of 7 or 8 points, but offerings increased even on this slight bulge, and the market soon showed a net decline of between 30 and 21 points on the active months. At this level offerings seemed to be smaller, and there was some buying for a turn as well as covering on the idea that a bearish census report to-morrow morning had been discounted, but after a raily of 9 or 10 points the market broke again, reaching the Awest level of the day late in the session when January sold at 129, or 40 points under the closing figures of Saturday and about 35 per bale below the high records of the season. The market was under pressure right up to the last minute, and closing prices were at practically the lowest. Beyond the predictions of a bearish census report to-morrow mornings and the weakness of the cables, which was attributed to liquidation, free Southern offerings and an absence of buil support, there appeared to be no special bear factors, but local sentiment has become very much unsettled, and it is evident that estimates of the crop are being increased in many instances. Near months were relatively steady on the break, sugert no special pressure of spot cotton, and many processing the cotton.
